First name: Bill

Last name: Roberts

Organization:

Title:

Comments: Bill Roberts called team lead Andrew Mueller to report an error on the maps included in the Draft Environmental Impact Statement. A private road off CA Highway 263, is incorrectly shown as a public Forest Service system road, 45N67Y. The continued inclusion of this road on Forest Service maps has encouraged the public to park on this road, unload ATVs, and ride on the Long Gulch Siskiyou County road 7J020 which threatens public safety.

Mr. Roberts also called to say he completed a shaded fuel break project on his land with a grant from South Yreka Fire Department. This fuel break, completed by mastication, may be useful to connect to the Craggy Project's proposed fuel breaks. The fuel break described by Mr. Roberts connects Canal and Long Gulches. Andrew Mueller located this fuel break using aerial imagery made the attached map showing the fuel break.
