Comments: I am a forth generation from Montrose. I have been raised and enjoy the life style that our area provides. Being a multi use outdoorsman I have chose to have a family and make western Colorado our home. We do a lot for our community as far a volunteering and donating money to worth while causes. We ride, hike and enjoy the trails in western Colorado. It is what keeps us in the area and it is what my family prides them selves in as far as enjoying the outdoors and sharing our trails with other multi users. I think all of our trails should remain open and that as our users grow that more trails can easily be added to make each users experience a little more unique. I hope my kids will have the same opportunity to raise their kids in this area and pass along the morals of out door use and cooperation among users that I have taught my kids.
