Title:

Comments: Foothills Landscape Project #52509

This is re-sent to include a photo.

My interest is knowing the specifics of cutting up to 90,000 acres of public land: how each parcel is to be cut, use of pesticides, and species preservation.

Extending the time for public comment may be required to fully define each issue.

I live in Fannin County, which is about 40% Forest Service or the like. My back porch looks like this photo, overlooking the Toccoa River valley.

The well planned and well executed conservation projects are important for our children and grandchildren.

My associations include the Mile High hikers, the Benton Mckaye Trail Association, and the Mountain experimental station.

Please keep me informed.

Steven Pruett MD
