Comments: "Greenwater ATM"

I strongly do not support the decommissioning or closing of roads in my National Forests, and especially the forest road system in the Lower Greenwater River Subwatershed and portions of the Upper White Subwatershed. Our National Forests belong to the people so access should not be reduced. In Washington State much of the private timber land that at one time was open to the public for enjoyment now requires a fee for access. Those timber lands are now shut off from much of the public because they cannot afford the access fee. Our National Forests must remain open for access to enjoy the benefits of the forest. Another issue is that not all individuals are capable of walking to enjoy the forest and need roads for enjoyment. When budgets get tight, road closures are not the first direction to turn to solve the problem while it might be the easiest. Please reconsider the closure or decommissioning of any roads in our National Forests. Thank you.

Jim
