Comments: Why bother having a comment period? With trophy hunter Zinke in charge, why bother? All Zinke cares about is exploitation of our land. This lease will be granted, the comments advocating protection will be ignored, and the leases granted. Zinke will side with oil and gas companies 100% of the time. He will side with hunters 100% of the time. What this administration is doing with pristine BLM lands is tragic. I heard one reporter comment that the administration is treating public lands like one giant urinal. So what's the point of having a comment period when it's just for show? For what it's worth I am opposed to mining and oil drilling in these mountains.
