Title:

Comments: Ruby Oil and Gas

I am strongly opposed to making available for lease any of the National Forest System's (NFS) land in the Ruby Mountains portion of the District, and I am even more strongly opposed to making any such lands available for oil and gas leasing by the Bureau of Land Management (BLM) in a future BLM lease sale.

The U.S. needs to transition to renewable and sustainable sources of energy which do not add more atmospheric carbon, and to protect pristine mountain lands for future generations to enjoy.

Barry Fass-Holmes
