Title:

Comments: I support a wilderness designation for Granite Basin & want to protect primitive lands for current & future generations. All citizens & visitors can appreciate nature & the solitude. I support wilderness in this area for recreational, non motorized activities such as hiking, horseback riding & cross country skiing. I support wilderness designation for Granite Basin because it protects ecosystems & mitigates against climate change. Once an ecosystem is destroyed, it's lost & difficult over many generations, or impossible to regenerate.
