Comments: Packet #11 "Air concentrations of VOCs near oil and gas prod" and Warning Signs: Please enter into public record for new Plan re fracking the Wayne

Since the Wayne and USFS have yet to evaluate the scientific record on impacts of fracking in a NEPA-based analysis, the new Plan clearly must do so if further fracking is contemplated under the Wayne. The attached studies on air pollution and human health impacts of fracking must be evaluated in an EIS-level analysis for the new Plan.

1. Peer-reviewed article:

G.P. Macey et al., Air concentrations of volatile compounds near oil and gas production: a community-based exploratory study. Environmental Health 2014 13:82 <https://doi.org/10.1186/1476-069X-13-82>

2. Full report about the study:

Warning Signs: Toxic Air Pollution at Oil and Gas Development Sites

3. News release also attached.

Sincerely,

Heather Cantino, Steering Committee Chair,

Subject: Please enter into public record re fracking the Wayne

To: Kathleen Atkinson

Since the Wayne and USFS have yet to evaluate the scientific record on impacts of fracking, and since Ms. Atkinson says that new information is what she needs to change her mind, I trust that this is new information to Ms. Atkinson and that she will welcome it to help her consider the impacts of her premature and ill-founded decision to consent. Ms. Atkinson can and must withdraw consent to this extremely dangerous and impactful industrialization of our state's only national forest. Please acknowledge receipt. Thank you
