Comments to: the Forest Plan Revision

Many times, I've written letters in support of non-motorized roadless area protections. I'm writing to support Weitas as new Wilderness within the Forest Plan Revisions. The 1.5 million acres of existing crucial roadless wildlands need more designated habitat protections. More than ever recent events from Idaho Fish and Game with illegally tagging wolves, shows the need for MORE protection and regulation to support non-mechanization in wilderness. Lastly, given the push to "thin" fuel sources and reduce wildfire risks, growing exploitation from logging companies need firm limits to support last remaining roadless wildlands. Do NOT move Cayuse Creek from the Weitas Cr. Roadless Area. Please prevent irreplaceable roadless areas including Upper N. Fork, Pot Mountain, Weitas Cr, and Fish Creek and Hungry Crek. Please no road building, logging or development of any kind. The 1.5 million acres including the entire roadless base on the Nez Perce-Clearwater Forest needs wilderness protections. Please keep habitat corridors and wild rivers intact for future generations.

Sincerely,

Julie Dalsaro
