Comments: I wait all summer to snowmobile all over the country. It's what my passion is. I love spending time with friends and family traveling all over the country to new places and zones. Its becoming harder and harder to do as once accessible riding areas are being closed left and right. Please leave our public open to those who want to enjoy it whether it be motorized or not. The national forests are so vast that we can all enjoy it together without disturbance or impact. Thank you for your consideration, I hope I can share this great hobby with my kids one day and there will still be places available to ride.
