Title:

Comments: Idaho Nez Perce Forest

I am opposed to further / additions to wilderness areas. Reason: such areas limit public access to only those that can walk/hike over eight miles. There is no reason to restrict access to the Big Burn area.

I support Alt W as it provides the most motorizes (OHV/ATV) access. Reason: forest roads provide public access for the most people (hikers, bikers, motorize (OHV/ATV/snowmobiles), and allow handicap folks access to back country too).

There is no need to build special 50 inch wide ATV trails. Logging roads (new or old) are just fine.

Yes to well managed logging.

Hi

I was able to visit Hoo Doo pass out of Superior MT and walk a little ways.

It is great! I would like to see more, but as I get older (73) I can't walk as far as most of you.

So please provide some OHV/ATV trails in the GREAT BURN.

Wilderness should not mean 'motor-less'.

Studies by MT FWP show that when wildlife hear a motor they know exactly where it's at and move around it.

It's those that walk in that surprise them (as in bear encounters).

So please provide some OHV/ATV trails in the GREAT BURN.
