Comments: I would like to vote for option B as I do not want to lose riding areas. I would also like you to consider adding more motorized areas. I moved to the Kenai Peninsula from the lower 48 4 years ago. I have never seen snow in my life and definitely did not think I would be riding snow machines. My best friend sold me his old sled to learn how to ride and to see if I would like it. Now after 3 seasons I can say I love snowmachining and the summer cannot end fast enough every year. My favorite place to ride is Nellie Juan and Lost Lake. I see on the other options that Nellie Juan is in danger of closing. One day I would like to take my son there on his own sled to share my passion for riding and enjoy the freedom we have as American citizens and Alaska residents. But if this zone closes down to motorized use I will only be able to show him pictures of a zone he will drive by on a regular basis. Please consider plan B and possibly adding more riding areas for families and friends who would like to explore and ride the backcountry together for many years to come.
