Title:

Comments: I have worked at Peninsula Powersports in Soldotna for almost 5 years now and our livelihood is selling sleds in the winter, with even some of the areas getting shut down it would hurt us greatly.

I also do lots of back country skiing. most of my close friends do both snow machining and skiing and we have always been so respectful to pack out what we pack in and not leave a footprint.

I admit not everyone does this, but to shut it down areas because one or two people are not respectful is wrong.

you will always have people that litter and are disrespectful.

everyone I have ever met in the backcountry is very respectful of the rules and regs whether it be snow machines or skiing.

taking these areas from us is unethical.

I respect all rules and regs that are in place, I always have.

losing these areas would take this amazing place we call home and make it something I can't use.

Thanks for your consideration and I hope God guides your decision.
