Title:

Comments: To the FS Supervisor(s),

My names Joey, I am a motorized user / advocate, and I spend most of the winter chasing powder in chugach (i ride turnagain, 20 mile, placer river, squirrel flats, nellie Juan, lost lake, whittier). I spend lots of money on riding - who knows how much but it is probably more than i want to know.

I've heard a lot of talking about the motorized corridors. I use the 20 mile corridor when it is open, and honestly am super thankful for that. If we could have more of those, that would be awesome and provide access to land that i'd love to enjoy (not to mention spread out users to decrease different user group conflicts). I've heard talk of the mining road just north of summit lake on the peninsula, that would be a prime example of a great motorized corridor. Especially with the warmer winters and the buzz kill alders. On the maps i noticed the whittier corridor to blackstone bay - another great example (thanks to whoever included that in the options). For me, a version of the proposed plan B seems to fit me and our user group most while considering other users groups too. I've also wanted to mention Wilderness areas. I object and do not support including any new additional acres in excess of whatever we currently have.

Nothing helps me relax more than forgetting real life and venturing into the Chugach. This is a very important issue to me, as I work all summer on road construction projects. Its nice to turn it all off and enjoy the mountains all winter.

Thanks for considering my input.

JJ
