First name: Andy

Last name: Moderow

Organization: Alaska Wilderness League

Title:

Comments: Please see the attached member comments.

Thank you for the opportunity to comment on the draft Chugach National Forest

management plan and draft EIS. Alaska Wilderness League works to preserve Alaska's

wild lands and waters by engaging citizens and decisionmakers alike. In Alaska, the

organization has a growing network of residents who care deeply about the longevity

and productivity of wilderness areas in all regions of the state.

Alaska Wilderness League reached out to Alaska members in person and online, asking

them to weigh in during this comment period. We asked them to consider the following

statement:

I support Alternative D for the Chugach National Forest Management Plan

revision, which would designate 97% of the Nellie Juan-College Fjord Wilderness

Study Area (WSA) as Wilderness. To protect this area until Congress acts, I ask

that the management plan be strengthened to protect and monitor the

wilderness characteristics of the WSA, so that this wild place can be handed

down intact to future generations!

Attached you'll find the names of 138 people who signed on to the statement above,

along with the additional comments of 29 people who offered further thoughts on this

matter.

Thank you for your consideration, and if you have any question, don't hesitate to

contact me!

Andy Moderow

Alaska State Director

Alaska Wilderness League
