Title:

Comments: Hello,

Bison, that once roamed in huge numbers, are now severely endangered.

Cattle are not - quite the reverse. If money was so important the Custer Gallatin National Forest would be bulldozed for Amusement Parks, casinos or whatever.

Money has its priorities, but not here, in a Wildlife Preserve.

"We Are Caring for the Land and Serving People". Good, and thank you. Care for the bison, serve the people who want to keep some of the original North American lands for present and future wonder and enjoyment. Please.
