Title:

Comments: I have lived in Montana for 2 years and spent 4 consecutive summers here prior to that. I am now a registered nurse in Billings. My greatest place of refuge on days that I don't work are public trails, where I know I always have access to some of the Earth's most beautiful places. Some of my greatest memories are on public lands. Keeping these places public is critical to keeping these memories alive for me and other who love this state.
