First name: Timmothy

Last name: Kaminski

Organization: The Mountain Livestock Cooperative

Title:

Comments: As a former Wildlife and Fish Program Leader throughout a 12 year period on 3 National Forests in Greater Yellowstone where both gray wolves and grizzly bears are now resident, I strongly advocate for an active land management role in wildlife conservation generally and most specific to 21st century conservation of large carnivores, especially wolves and grizzly bears across forest and working landscapes related to livestock, range management and working ranches at the private-public land interface.
