Comments: GMUG Forest Revision Feedback Form

Submitted by Dina D. Smithson

See PDF attachment of feedback form.

Thank you!

Remove pack goat band from draft. No scientific evidence implicating disease transmission of packgoats to bighorn sheep. See my letter dated July 7, 2019 in public reading room. See my comments along with other safe management practices offered by NAPga. See all letters/comments in public reading room. The working draft characterizes this as a forest-wide ban, with no flexibility at all. Take into consideration all facts and points of concern brought forth in comments by NAPga members. Dialogue with NAPga Board on their responsible/safe practices video/guide/instructions.
