Title:

Comments: The loss of current open OSV terrain over Ophir Pass, Blint Pass (a.k.a. Oscars), Lewis Lake, Bridal Veil Basin, Blue Lakes, Mudd Lakes, Ingraham Basin and Black Bear Pass to semi-primitive non-motorized status needs improvement. This feedback refers specifically to Ophir Pass, Black Bear Pass, and Open OSV terrain, which is categorized as semi-primitive non-motorized in the working draft. I would re-categorize it as semi-primitive motorized. The current plan allows for open OSV terrain, there is 2 helicopter skiing companies permitted in area, as well as several backcountry ski huts. Heavy recreational use area.
