First name: John

Last name: Carter

Organization:

Title:

Comments: Please see attached pdf, which represents joint comments submitted by seven regional conservation organizations, in addition to a combined set of attachments. The attachments include past scoping comments submitted by the conservation groups (which we note were more-or-less ignored in this NEPA process). The attachment also includes a report that details a sophisticated forage capacity model and analysis for the High Unitas Sheep Analysis Project area (which was also ignored in this process).

Thank you.
