Title:

Comments: I have been camping up in the white mountains since i could walk and talk as a child. 25 years of unforgettable memories with my family and friends. Big lake, Greer, right on top of the rim off of 260, willow springs and woods canyon. Please do not take away these wonderful experiences from future generations. They are glued to the screens, phone, tablet, tv. We need all the wilderness we can get to show them the beauty of Arizona. Please look for another way to help protect the forests other then closing roads forever. Just recently in Tonto they shut down the camping along webber creek and it truly hurts.
