Dear Unites States Forest Service,

I highly object to any changes to the Roadless Rule in the Tonagass National forest. I have looked over the proposal of changes and out of the five options that give up protected land for roads there is not one that provides significant economic benefit. Certainly not economic benefit that would be worth the economic risk of building and extending road networks in the forest. I urge the decision of no change.

We are currently facing a climate crisis. It is imperative that we find economic growth in different ways then natural resource extraction. We have legislation in place right now for protection of our national forests. We do not need to be changing working backwards on safeguards that have been put in place to protect the land.

Thank you,

Brook Cinocco
