Title:

Comments: Thank you for the opportunity to comment. I'm a 40+ year resident of Alaska, most of which was lived in Southeast Alaska in the communities of Juneau, Haines, Craig and Petersburg. These public comments are difficult to participate in if you don't have an in-depth knowledge of the complexities of forestry management, however, I do love, as most Alaskans do, the land, animals, water and scenery that surround us. I also appreciate that communities need an economy to have a future. The Tongass is a multi-use forest and should be managed to provide for reasonable, rational uses that give communities an opportunity to develop their economic future. Based on your attached EA Overview chart, I support Alternative 6 to give the greatest flexibility in land use without losing existing permitting processes.
