First name: Shirley

Last name: Pharis

Organization:

Title:

Comments: Old growth forest are vitally important to the environment as well as to our countrys heritage. They are a national treasure & cannot be bought or traded away for further destruction to the environment by drilling or mining for fossil fuels. Please wake up to the horrific effects of climate change these carbon emissions have done to our earth. Our government should be the gatekeepers for protecting our country, not the irresponsible interlopers trying to steal the natural resources for greed & short term profit. Please stop the desecration of America! It belongs to the people & to the generations who follow us. Our public lands are nit for sale!
