Comments: Alternative One - Do Not Deforest

Hi,

I am writing to inform you that I choose Alternative One. It is imperative that we reduce the amount of logging and deforestation happening to curb climate change. These ancient trees are key stakeholders in carbon storage, and without them we would greatly impact the reduction of carbon emission within that area but also the world globally - it is not just one tree, one park, or one country that matters; we must all fight together to defeat climate change and leaving the forest is the first step.
