First name: Austin

Last name: Leslie

Organization: Life teen camp hidden lake

Title: Facility manager

Comments: Good morning. After reading about this proposal, our company would like to ensure that no disturbances would affect our area. We are a summer camp in the middle of the chatahoochee national Forest. Clearing trees and making paths to clean them will affect our view and peace of hundreds of acres that we are able to view and use. As a person that lives in this region as well, I believe that nature has been around for millions of years sustainably carrying out it's own ecosystem without the help of human intervention. I am a active outdoors man. This clearing will affect many habitats of animals, it will affect people who use the Appalachian trail for hiking, it will bother businesses like mine who are fortunate enough to have the incredible view of the Forest untouched. Please do not clear this land. The natural ecosystem can take care of itself. I hope the national foothills project will not happen.

I have attached our main view from our property.

Thank you,
Austin
