Trash Left in the Forest by Irresponsible Campers/Visitors

Please include in your environmental assessment the impact of all the trash left behind in the forest by irresponsible campers/visitors. This does fall within the scope of this project, as it impacts the overall health of the forest and has the potential of causing harm/injury to the wildlife, including the wild horses. The photos here are only a miniscule example and in no way expresses the magnitude of this problem of people dumping trash in the forest. This is a HUGE problem in the recreational area of Black Canyon Lake, which is within the Heber Wild Horse Territory.

Just a few examples of trash that I picked up out of the forest that had been left behind by irresponsible forest campers/visitors:
