Comments: I am attaching the Blue Mountain Biodiversity Project's initial comments on the Walton Lake Revised EA. BMBP will submit additional final comments tomorrow, and will resubmit these initial comment as an exhibit to those final comments. The final comments tomorrow will be submitted both electronically and via US Post Office certified mail.

And FYI, the link for submitting comments in the USFS's Feb 18th Letter does not work. I was only able to find this page by first going to the project page. Other potential commenters may not be able to figure that out.
