Comments: The North Fork Nooksack watershed is such a unique and beautiful landscape. It is an important economic resource for local communities as it draws hunters, fishermen, hikers, climbers, and even out-of-state tourists. The main draw for those pursuing recreation opportunities is the natural environment. The proposed logging, thinly veiled as "Vegetation Management", will cause major disruptions and decades of consequences. Do not let this be your legacy.

I understand that National Forests are fair game for activities like logging, but please consider land elsewhere for that purpose. The wilderness of the North Fork Nooksack is irreplaceable and something I want my kids to be able to enjoy and treasure as much as I have.

I've included a photo of myself on a trail in the area in question. I want to return to this location in 10 years and take the same photo with my little girl and I want her to experience the same magical wilderness that I did.
