Title:

Comments: There is an error (I assume) in one of the text boxes describing the proposed project. See the attached screenshot. It says the County will bury a 12" water pipeline. Elsewhere in the document the size of the water line is given as 6 inches. I object to any water line larger than necessary to provide water for the stated purposes.

I oppose any development for housing or hotels in the vicinity of the ski area. I do not support providing electrical connections to the Camp May campground.
