Comments: Statement of issues and/or parts of the plan revision to which the objection applies:

I object to the Forest service, not including standards to protect bison habitat or list them as species of conservation concern.

Concise statement explaining the objection and suggestion how the proposed plan should be improved:

The reasons for this objection are: Bison are icons of America. If they do not deserve inclusion as species of concern, what does? What kind of plan does not include the major species of the area?

Proposed Solution: INCLUDE BISON

Statement demonstrating the link between objection and prior formal comments: You seem to be ignoring the fact that habitat standards for migratory bison has broad public and tribal support.
