Comments: I am proud to submit my comments in support of Midas Gold Idaho's Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and use private investment to clean up a brownfield site.

The study of the Stibnite Gold Project brought to light the environmental conditions existing at Stibnite because of past operators. Arsenic levels in the East Fork of the South Fork of the Salmon River are far beyond safe standards. If Alternative 5 is selected, how will USFS address these legacies impacting the waters of Idaho? Who will pay to provide permanent and volitional fish passage? No one has stepped up to clean the site yet and I find it highly unlikely another opportunity like the Stibnite Gold Project will come around. Midas Gold has presented plans to improve water quality and fish habitat under Alternative 2. Section 4.12-39 of the DEIS shows reconnecting fish to more habitat upstream will increase productivity and diversity of these isolated populations. We cannot let the site continue to suffer.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using the alternative two presented by Midas Gold, as expeditiously as possible.
