Title:

Comments: Have rafted the lower salmon every summer for the past 10 years. PLEASE do not rush altering this amazing river and habitats natural flow. It is one of the only places left that truly feels wild and untouched by human hands. Ruining this would be a terrible mistake to the ecosystem and future generations of people that want to experience the untouched grounds of America that are so hard to find. Please do not enable this mining production on one of the most beautiful and last wild places in the country!
