Comments: Excerpt from IP form attached:

I have listened to the online forums that discuss the [lsquo]progress[rsquo] of logging in Montana. I am wholly against logging and resource extraction of this last best place. The Forest Service should not sell the public short. Public Lands are being litigated and ran by a few affiliated parties, and the public often has little no chance to speak up and comment before these resource extraction/[rdquo]access[rdquo]projects go underway, mostly because our communities are disbanded and no longer together on things, misinformed. Economy is the only thing that matters in capitalist system, and the forest has no importance to our [lsquo]community[rsquo] until it is cut down and liquidated.
