Comments: Attached is my Interested Person Request form. My specific objections in that form are: "My original letter mentioned two major concerns: the ongoing mass extinction and climate change. I mentioned how preserving wilderness can be an integral part of combating/ameliorating both of these crises. With only three species of concern listed in the new Plan, I am extraordinarily concerned that the USFS is not responding with sufficient interest to the extinction crisis. And, as I noted earlier, BCAs are simply not a substitute for RWAs.as they leave too much "administrative flexibility" regarding motorized travel and other uses."

Excerpts from attached:

Wildlife diversity; backcountry area designation v. recommended wilderness study area.
