Excerpt from attached:

Recommended Wilderness designations in the Pryor Mountains. Motorized and/or mechanized recreation suitability determinations in recommended wilderness and backcountry areas in the Pryors. A new and compelling reason for our concern is the notice published in the Federal Register last week (Thursday 9/24/2020) announcing an intent to permit and [ldquo]promote[rdquo] electric motorcycles (e-bikes) on nonmotorized trails wherever mountain bikes are permitted. It is Orwellian [ldquo]newspeak[rdquo] to claim that electric motors are not motors. And it is unconscionable to permit motorcycles in these areas.
