Comments: Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Draft Environmental Impact Statement. Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts.

I am grateful for the tools the USFS has provided to review the document. One area I was particularly interested in taking a closer look at was the tailings storage facility. I was happy to see in chapter 4 of the DEIS it says, [acirc][euro]Based on the slope stability analysis of the proposed design of the TSF dam, failure of the TSF dam from a seismic event is considered to have extremely low probability.[acirc][euro][bull] This is good news considering the recent earthquakes Idaho has seen. Additionally, I am impressed with the location of the TSF under Alternative 2. This alternative uses the mountains to help secure the facility and would mean the dam would only cover 10% of the entire perimeter. Whereas Alternative 3 would move the TSF to a pristine area [acirc][euro]" a subpar option.

There has been more than sufficient time to comment on the Stibnite Gold Project. I encourage the U.S. Forest Service to move the Stibnite Gold Project forward and adopt Alternative two as the preferred alternative.
