Title:

Comments: As a sixty year old man, that hasn't ridden my Mountain bike for a decade due to bad knees and a fractured ankle, my electric pedal assist bicycle has given me a new lease on life! My wife has one too, and we enjoy the bikes so much, we bought an additional one for guests to ride with us!

I am asking you to allow electric bicycles on National Park Trails so that we, and many others can know the beauty and splendor of our National Park Service and this wonderful country!
