Comments: To whom it may concern: I recently purchased a Class-1 ebike (picture attached) to avoid exertion of my heart after having been diagnosed with a stroke. I am an experienced MTB and do every effort to respect those without pedal assist on the trails by only passing them when its appropriate and safe.

Recently I have discovered trails in Orange County that do not allow ebikes. I find this disappointing because I'm not able to ride the same trails I use to. I'm ok with restricting Class-2 and Class-3 ebike on trails but Class-1 ebike do not present any threat or problem to others as long as the rider adheres to the same rules of a regular MTB.

Best regards, Mr. P. Figueredo
