Comments: Open up more lands and expand trail systems to allow E-Bike growth for years to come. E bike allows riders to cover more ground in a shorter amount of time with all the same features of a regular mountain bike. I would like to see more dedicated parks and recreation areas for mountain bikes and E bikes in the So Cal area. Class 1 E bikes have the same tread impact that regular non assist pedal bikes have. E bikes allow the whole family and friends of different skill levels and fitness levels to ride together as well.
