Comments: I own a class 1 ebike and I am 64+ years old and the class 1 ebike allows me to continue doing what I love to do and that is riding single track trails away from cars and masses, most of the time I never see another soul. I ride slower than the purist MTB rider. I am limited in assistance that a ebike gives me, there is no free ride, I have to do the work to get the assist up to 20 MPH and I usually ride at 12-14 MPH on a clear trail and more like 5-8mph on a typical MTB trail. My Haibike is quiet and does no more environmental footprint than a non ebike. For equestrians to complain about ebikes is discrimination. Horses allow many horseback riders to get into the backcountry that would not be able to walk there without a horse due to health or age. So lets do the right thing and allow class 1 ebikes wherever mountain bikes are allowed. Thank you.
