Comments: Please allow Class 1 eMTBs equal trail access as traditional mountain bikes. I've been riding MTBs in Lake Tahoe since moving to the area in 1988, but over the years I've sustained knee injuries that prevent me from riding like I'm used to. The most recent injury was the result of an off-leash dog on a trail that attacked me whilst riding my bike, destroying my left knee. Now I need some assistance to pedal uphill, which a Class 1 eMTB is perfect for.

Please, on my behalf and the thousands of others like me, allow equal access for Class 1 eMTBs on non-motorized USFS trails.
