Title:

Comments: I personally ride horses and hike . Adding Electric bikes to non motorized trails is so dangerous.

We share our trails but the concern of bikes that can be governed up to 28 miles per hr can also go faster. (See attached). Terrifying to think of meeting someone on a corner or downhill. Regular mountain bikes are hard to hear as it is and scary enough. This iui s a recipe for disaster and very real possibility of loss of life. Non motorized should remain non motorized. There are plenty of off road motorized trails they can ride on. Its about safety , nothing else.
