Comments: Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Comment Period. I have been closely following Midas Gold Idaho's plans since they first came into our state, in large part because much of the proposed project will take place on public land. The more I have learned about the project, the more excited I am about the possibilities it will bring into our state.

What I like about Midas Gold's plan is that it offers solutions for damage caused by legacy operations and creates a brighter future for the site. For example, Midas is cleaning up old mining waste from projects dating back to the WWII era. I know that Alternative 2 is a holistic proposal that addresses existing issues and protects against their reoccurrence. Tailings are just one issue related to mining projects, and Midas is addressing them directly. Under Alternative 2, the company will construct a long-term storage facility for future waste from mining operations. The facility is designed to withstand an earthquake up to 6.5 on the Richter scale. I feel confident the company has considered multiple scenarios in the design, so it will be able to operate continuously with no problems in order to protect the environment.

I appreciate your time and thoughtfulness. The USFS has provided plenty of tools to review the DEIS and make commenting within the 60-day timeframe possible. For the reasons I stated in my letter above, please permit the Stibnite Gold Project using alternative 2 and let Idahoans see the benefits of this important project.
