Title:

Comments: Thanks for the opportunity to respond. I have been a continuous mountain biker since 1983.

Purchased my 1st e-bike in 2014 as it afforded me the opportunity to continue to access wilderness areas that I love to recreate with my presence. I now have 40+ friends who have also made the transition to e-mtn bikes for the same reasons. This technology allows us to visit wilderness areas in our later years.

e-bikes are not the problem riding with regular bikes, the entire mountain bike sport has become a main stream sport enjoyed by a growing crowd the past 10year. What needs to be done is to assign One-Way trails. Or create a second set of trails to accommodate 2-way use. Please allow Class 1 ebikes to operate as a human powered device. Sincerely, Gary Cogorno
