Comments: Dear Payette National Forest Staff,

Thank you for the opportunity to provide my feedback as part of Midas Gold Idaho's public permitting process. I am grateful for the tools the USFS has provided to review the document. One area I was particularly interested in taking a closer look at was the tailings storage facility. I was happy to see in chapter 4 of the DEIS it says, "Based on the slope stability analysis of the proposed design of the TSF dam, failure of the TSF dam from a seismic event is considered to have extremely low probability." This is good news considering the recent earthquakes Idaho has seen. Additionally, I am impressed with the location of the TSF under Alternative 2. This alternative uses the mountains to help secure the facility and would mean the dam would only cover 10% of the entire perimeter. Whereas Alternative 3 would move the TSF to a pristine area [Acirc][ndash] a subpar option. Thank you for reviewing my comments. Again, I urge you to permit Midas Gold's carefully thought out plan as outlined under alternative two.

Thanks for your time,

Name: Jackie Blom
