Comments: Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's comment eriod. I have been closely following Midas Gold Idaho's plans since they first came into our state, in large part because uch of the proposed project will take place on public land. The more I have learned about the project, the more xcited I am about the possibilities for the future.

Midas Gold has worked hard to ensure the safety of the community during construction and operations of the Stibnite old Project. To minimize travel near important waterways, Midas Gold has proposed using Burntlog Road. This allows he company to take advantage of existing Forest Service roads and reduce travel on Johnson Creek and South Fork oad [acirc][euro][Idquo] both of which are heavily used by recreationalists. This plan maximizes safety and ensures all Idahoans have coess to our public lands.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than hundreds of jobs to rural Idaho and still provide ccess to Idaho's public lands. This is the type of project our state needs. The U.S. Forest Service has provided Idahoans ith meaningful tools to easily review the document and ample time to comment. I highly encourage the U.S. Forest Service to permit this project following alternative two.
