Comments: IREA endorses utilizing set shooting range locations due to the damage done to our facilities when the public uses IREA facilities as their targets. However, it appears that IREA has a line through the middle of one of the 7 proposed sites, referred to as the Kelsey Creek Range. Based on our mapping, it appears that there are 11 poles located within the 3D archery course. The course will need to be arranged to avoid possible damage to those facilities, and ensure 24/7 maintenance access is not impeded. Ideally, the line would be rerouted or the archery range relocated to avoid having any IREA facilities within the proposed range.
