Comments: : This at the Wye Campground at Gold Camp Road and 381, garbage left everywhere, every sign in the area shot up, They were all just recently replaced, which tax payers paid for, Trees everywhere are shot down, This is going on every where up in that area, signs shot along every road and trail head with bullet holes aimed towards roads and trails .This is happening all along Gold Camp Road, 379,381 and at each end of trail 626. I contacted Teller County Sheriff office and they said they cant do anything about it and told me to contact the Forest Service.

If you can notice in the 4th photo there is a home behind the sign and bullet holes in direction of home.The signs pictured all have bullet holes in direction of on coming traffic., . Question, Is there anything that can be done to stop this? This has been a growing problem for years and it is getting much worse. This shows that unsupervised shooting is just never going to work, someone is going to get hurt or killed or the forest is going to get burned down, The shooting attracts a bad and negative element to the area. This belligerent irresponsible activity needs to be stoped for good.
